Three Critical Talks & Group Discussion

Plenary session 09:00 – 11:00

15th of September 2017

Blue City, Rotterdam

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 613169.

Our International Advisory Board

Tim O'Riordan
(chair)

Edina Vadovics

Ariel Gordon

Gilda Farrell

Frances Westley

Process of this session 09:00-11:00

When	Who	What
09:00	Tim O’Riordan	Opening, Framing and Introducing Speakers
09:15	Edina Vadovics	Ecological Sustainability & Urgency for TSI today (10 min) Round 1 group discussion (15 min)
09:40	Ariel Gordon	Exclusion/Inclusion Dynamics: Perspective from the South (10 min) Round 2 group discussion (15 min)
10:05	Gilda Farrell	Looking back at 25 years of EU (social) innovation policy (10 min) Round 3 group discussion (15 min)
10:30	Panel	Open Q&A with the whole audience Closing reflections Tim O’Riordan

Ecological Sustainability and the Urgency for TSI today

Edina Vadovics

Ecological Sustainability and the Urgency for TSI today

Edina Vadovics

GreenDependent Institute

www.greendependent.org

“We tend to put the environment last because we think the first thing we have to do is eliminate poverty. But you can't reduce poverty in a vacuum. You are doing it in an environment.”

- Wangari Mathai

Obvious? Happening?

Assumption:

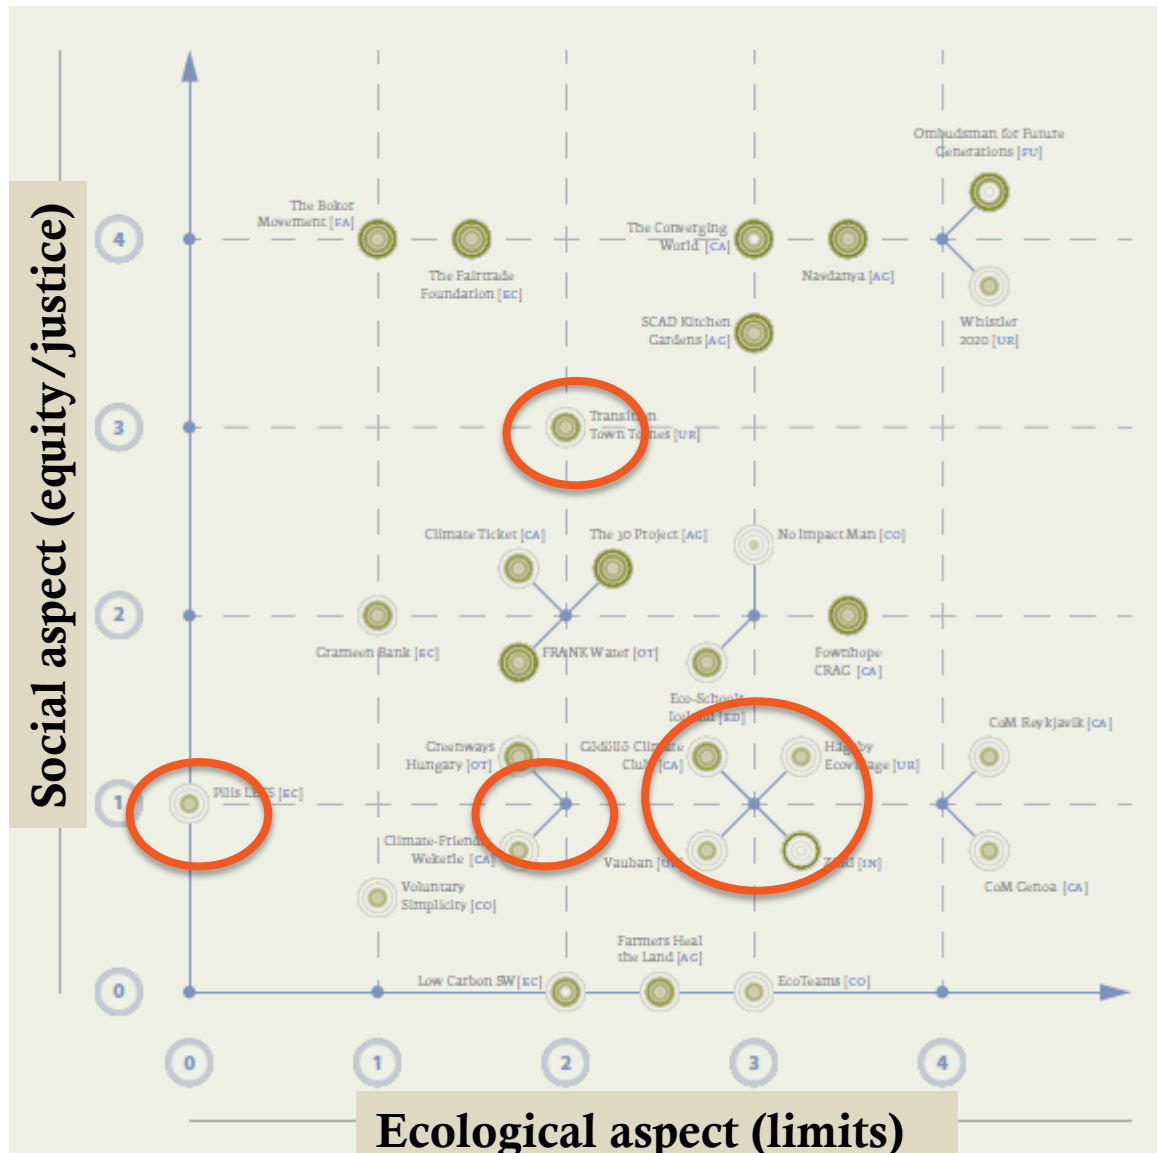

connection between social and environmental is being made in SI initiatives, and the result is something more „sustainable”

Sustainable?

Strong and just sustainability:

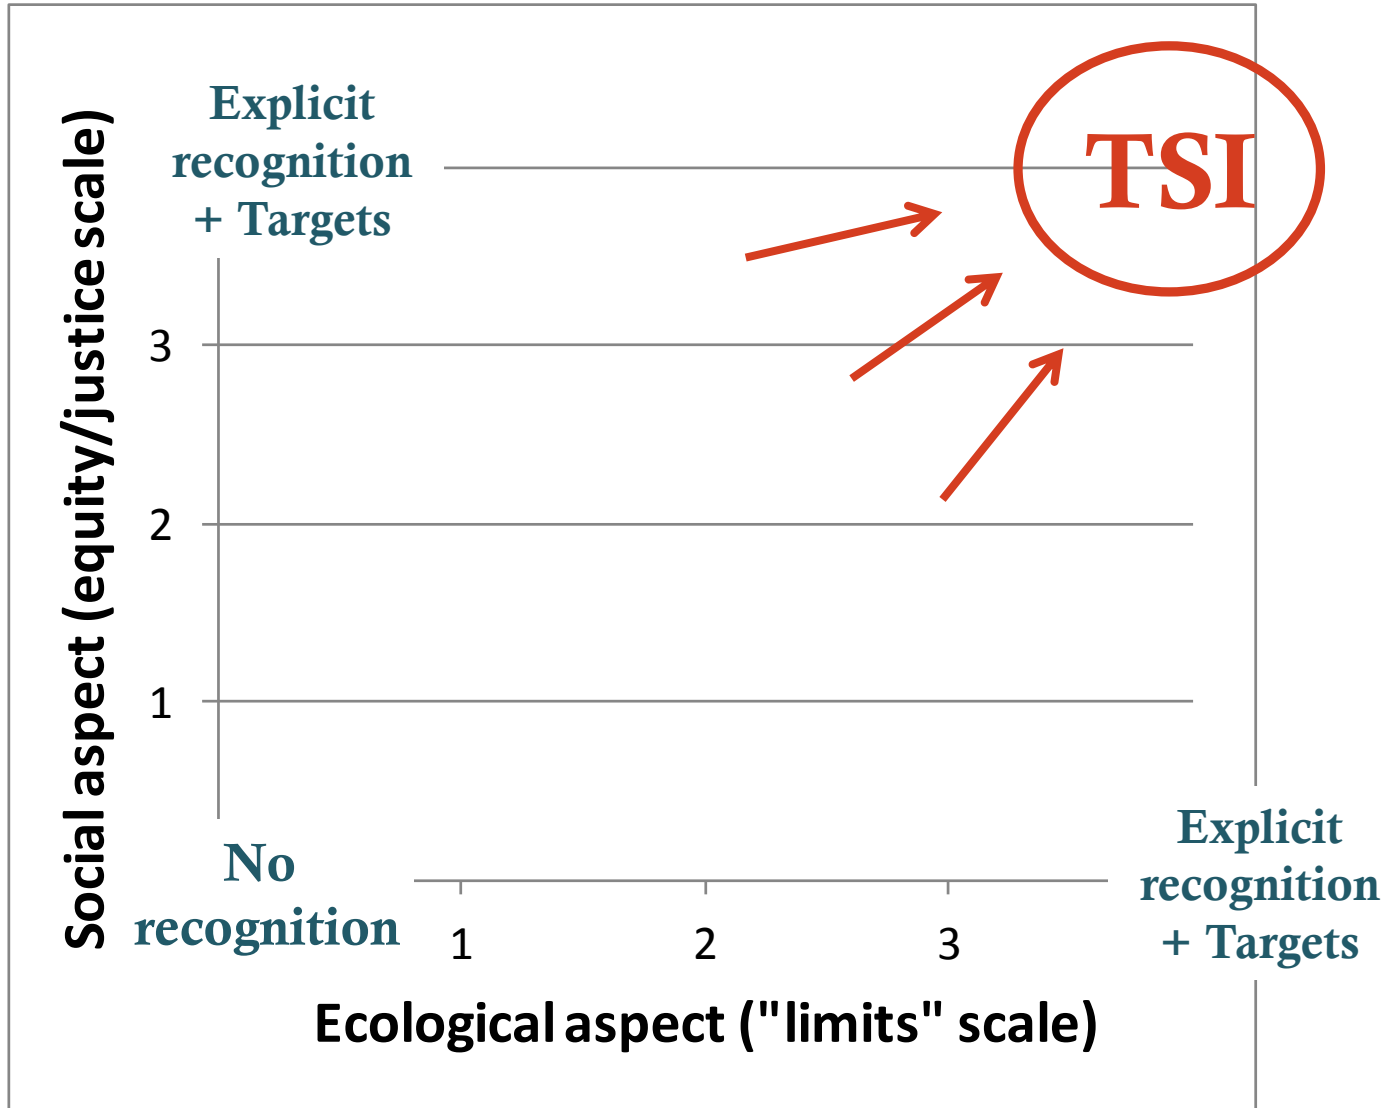

- Respect for ecological limits / planetary boundaries
- Equal access to resources and benefits, and equitable burden sharing

SI does not automatically connect the two, and the connection is not always strong

Source: Vadovics et al., 2012 // CONVERGE project

Social innovation becomes *transformative*:

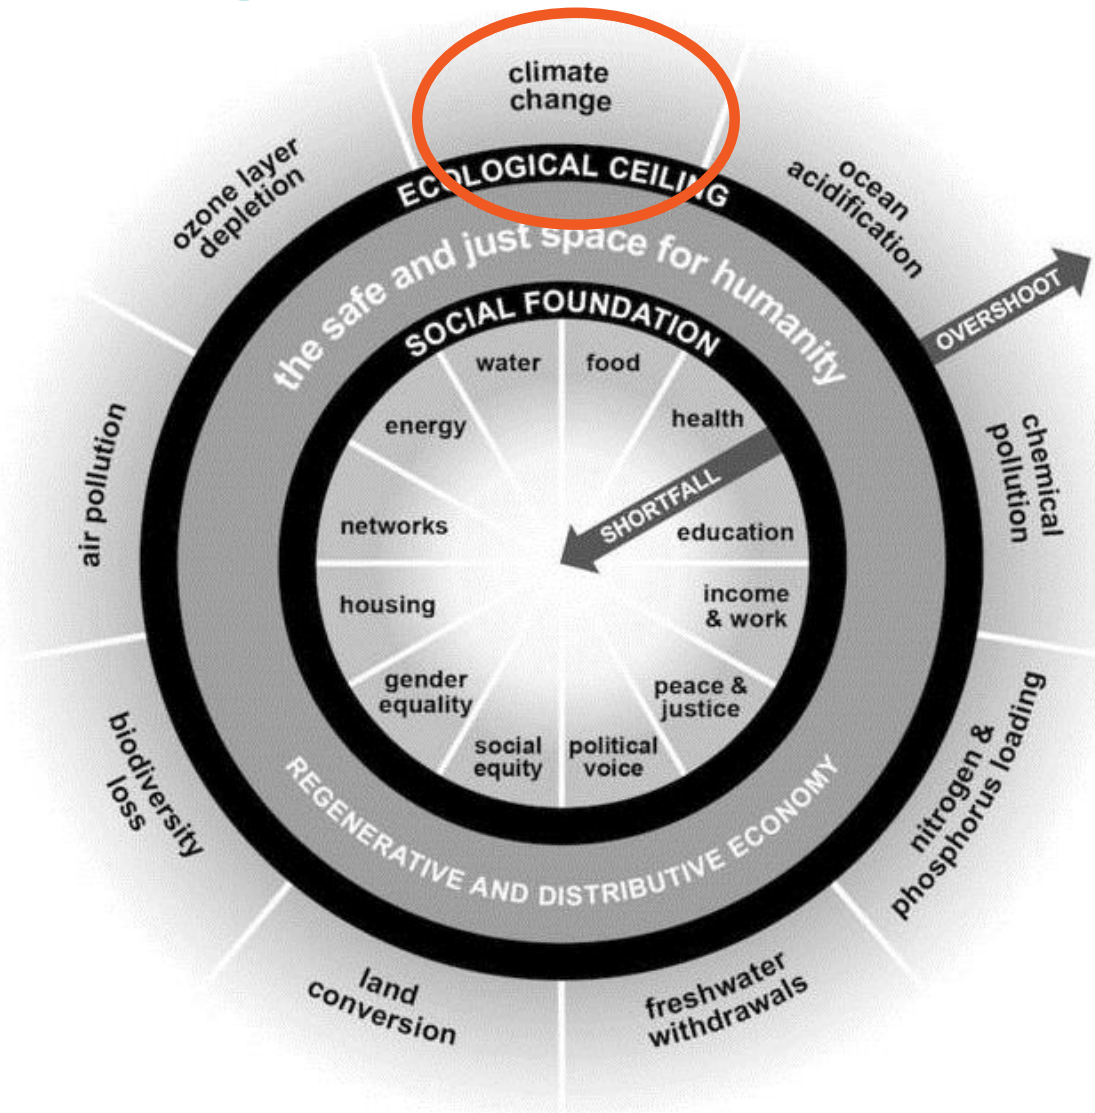

Or, put another way: TSI helps move into the „doughnut”

**Ecological
limits or
Planetary
boundaries**

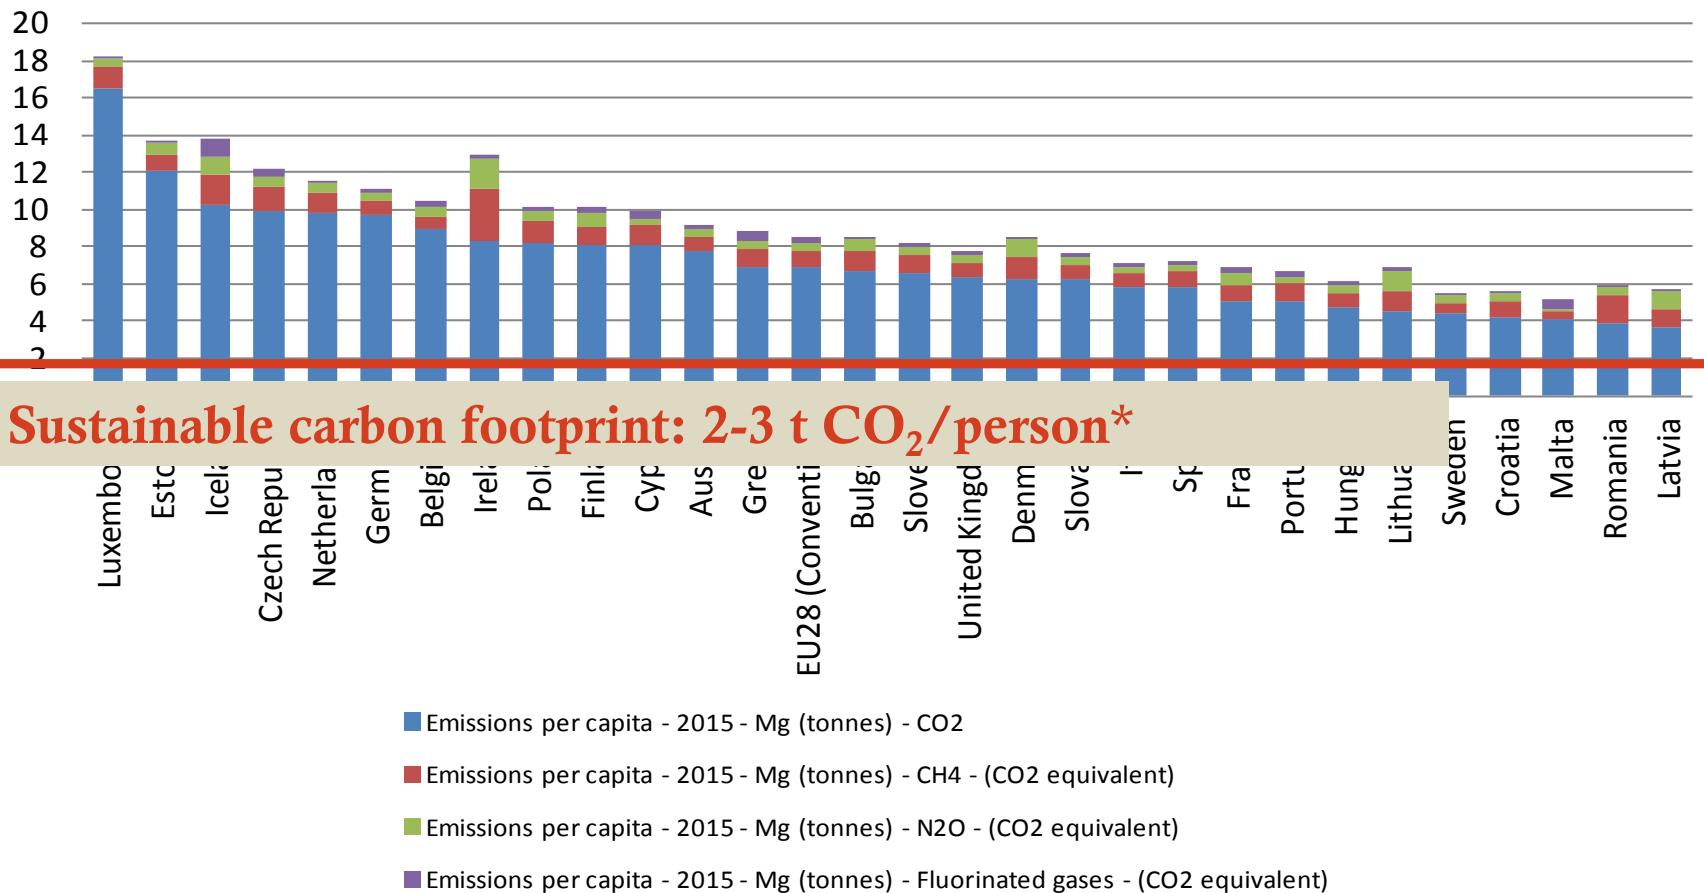

**Social limits
or
Critical
deprivations**

Planetary boundaries example: climate change

Climate change - Carbon footprints in Europe vs. „Sustainable” footprint

Emissions per capita
(EEA, 2017 - based on 2015 data)

*Sources: www.ecocivilization.info and timeforchange.org/

Ecovillagers' carbon footprint? Not necessarily small enough either:

Example: Findhorn ecovillage
carbon footprint cc. the same as UK average

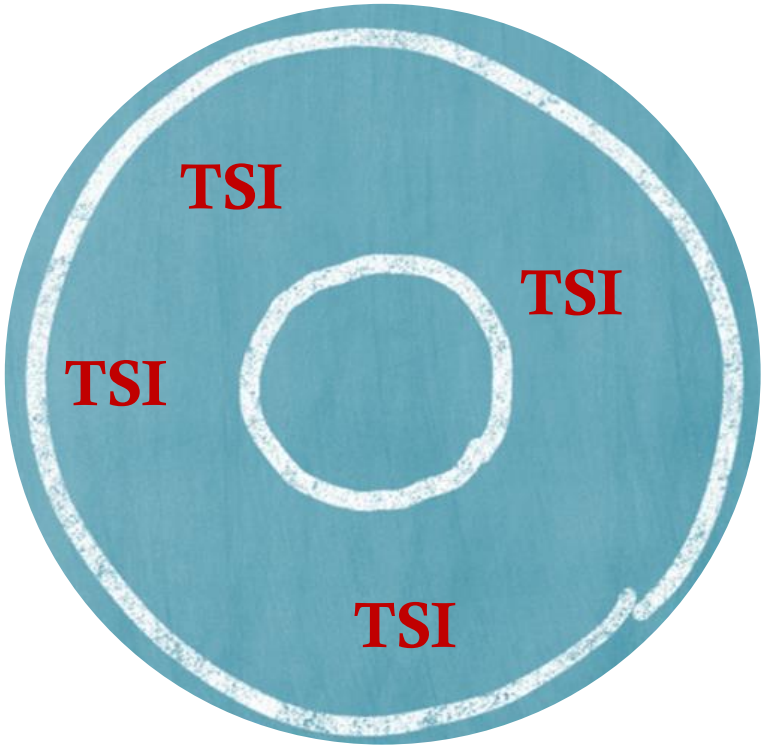

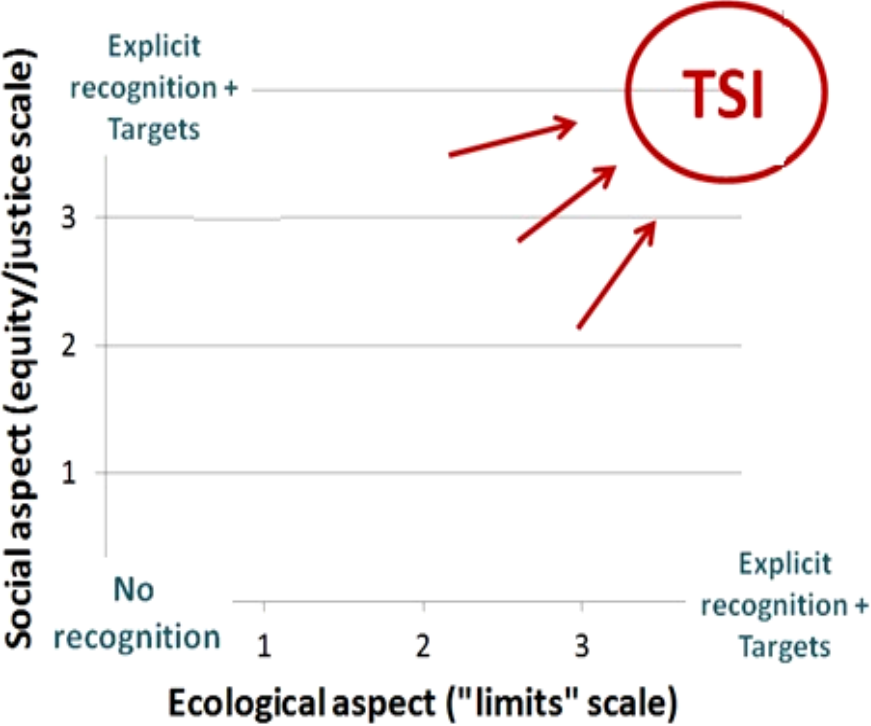

Example: Biobriquettes (Hungary)

Example: SCAD Kitchen gardens and fruit tree afforestation (India)

Transformative Social Innovation combines ecological and social aspects

Question Group Discussion #1

How strong is the connection between social and ecological aspects in your work and how can you make it stronger?

Inclusion/Exclusion Dynamics of SI: Perspective from the South

Ariel Gordon

An aerial photograph of a residential neighborhood, likely in the South, showing a stark contrast in housing quality and density. The upper portion of the image shows a dense, multi-story apartment complex with many small, uniform units. The lower portion shows a more affluent area with large, single-family homes, extensive greenery, and swimming pools. The text 'UNEQUAL SOUTH' is overlaid in the center, highlighting the socioeconomic disparity.

UNEQUAL SOUTH

Environmental Debt

CO2 emissions per capita in Tons per year (2015)

Source: Emission Database for Global Atmospheric Research, EDGARv4.3.2, European Commission, Joint Research Centre (JRC)/PBL Netherlands Environmental Assessment Agency.

Inclusion/Exclusion Dynamics of SI

Rene Magritte, Hegel's Holiday, 1958

Rene Magritte, Hegel's Holiday, 1958

Question Group Discussion #2

What are the exclusion dynamics in you work and what could you do to make it more inclusive?

Question Group Discussion #2

What are the exclusion dynamics in your work and what could you do to make it more inclusive?

Looking back at 25 years of EU (social) innovation policy

Gilda Farrell

THE TRANSFORMATIVE POWER OF SOCIAL INNOVATION

LEARNINGS FROM THE PAST FOR THE FUTURE

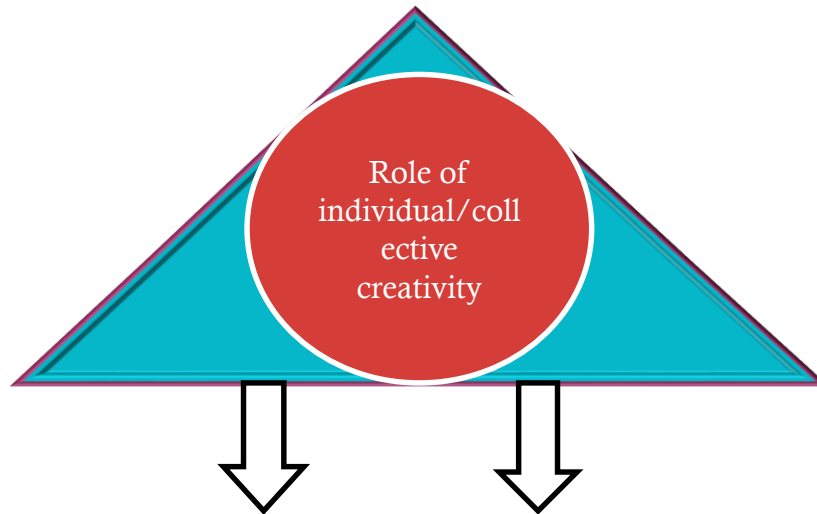

GILDA FARRELL

MEMBER OF THE TRANSIT PROJECT BOARD

September, 2017

TRIANGLE OF TRANSFORMATION

Decentralisation (power, decision, access)

Self-regulation

Re-appropriation

(sense of property belonging/responsibility)

Pedagogy of interrelations

From experimentation to policy/structural transformation

Underpinning transversal values: from “good practices” to political models

MARKET

Fairness; coop-competition;
virtuous links;
co-responsibility

ENVIRONMENT

Zero waste; zero fossil
energy; share; reuse;
right to commons

Political changes:
progress to fair access;
fair universal basic
income; new
democratic
institutions; rules/legal
frames fostering pro-
active, co-created
solutions and
commons; conscious
consumption only of
renewable resources;
Progress in utopias &
real choices for the
future

GOVERNANCE

No-ideological or
Symbolic soft control ;
fairness; utopias;
co-responsibility and
creativity;

SOCIETY

Diversity/co-creation;
solidarity; diversity;
right to knowledge
& creativity;
to shared vision and
to influence the future;

Question Group Discussion #3

When we imagine ourselves in the future looking back at our work today, what may be our blind spots regarding transformative change?

Questions & Comments to our Panel
