Social Innovation

Social innovations are new ideas that meet social needs, create social relationships and form new collaborations. These innovations can be products, services or models addressing unmet needs more effectively. The European Commission's objective is to encourage market uptake of innovative solutions and stimulate employment.

Objectives

The Commission's actions on social innovation stem from the [Innovation Union initiative](#) (2010) and of the [Social Investment Package](#) (2013). These actions facilitate the inducement, uptake and scaling-up of social innovation solutions. The main objectives are:

- promoting social innovation as a source of growth and jobs
- sharing information about social innovation in Europe
- supporting innovative entrepreneurs and mobilising investors and public organisations.

A repository of Critical Turning Points: making sense of TSI timelines

On breakthroughs, setbacks and surprises in processes of Transformative Social Innovation.

By [Bonno Pel](#) (ULB), [Linda Zijderwijk](#) (IHS) and [Adina Dimitru](#) (UDC).

Through this blog we'd like to introduce you to our database project on Critical Turning Points in transformative social innovation. In the following we will explain how these Critical Turning Points help to make sense of social innovation processes, how we describe them, and how we seek to collect a diversity of those experiences from about 80 social innovation initiatives in various countries.

The Critical Turning Points database; concept, methodology and dataset of an international Transformative Social Innovation comparison

Experimenting with alternative economies: four emergent counter-narratives of urban economic development

Noel Longhurst¹, Flor Avelino², Julia Wittmayer², Paul Weaver³, Adina Dumitru⁴, Sabine Hielscher⁵, Carla Cipolla⁶, Rita Afonso⁶, Iris Kunze⁷ and Morten Elle⁸

CrossMark

Neoliberalism is a powerful narrative that has shaped processes of urban economic development across the globe. This paper reports on four nascent 'new economic' narratives which represent fundamentally different imaginaries of the urban economy. Experiments informed by these narratives challenge the dominant neoliberal logic in four key dimensions: What is the

Introduction
In the 'century of urbanisation' [1,2] cities are seen as critical sites for societal change in general [3] but also specifically instead of specific sustainability transitions [4,5,6*]. Attempts to steer urban sustainability transitions

#WeWashing: When “Sharing” Is Renting and “Community” Is a Commodity

By Lee-Sean Huang

WeWashing is a new term that refers to the abuse of words like “sharing” and “community.” Use #WeWashing to identify and critique this abuse.

Whitewash, Greenwash, WeWash

I am usually a satisfied user of services like AirBnB and Uber, even if I don't 100% agree with all of their corporate policies and practices. But I cringe every time I hear these companies, and others like it, described as part of the “Sharing Economy.”

Philanthropy & Funding

A Neoliberal Takeover of Social Entrepreneurship?

A model of social entrepreneurship focused on market-based solutions and profit is threatening to crowd out more collaborative approaches.

SHARE COMMENT PRINT ORDER REPRINTS

By **Jyoti Sharma** | Sep. 19, 2016

I recently found an interesting article by Martin Jacques, who, in the early 1980s, heralded and warned against the economics with minimalist neoliberalism, but this article argues that neoliberal policies have led to slow growth in 90 percent of the population.

The watering down of participatory budgeting and people power in Porto Alegre, Brazil

by **DANIEL CHAVEZ**

Introduction

In the Brazilian city of Porto Alegre, previously famous as the birthplace of the World Social Forum and the global capital of participatory democracy, the centre-right coalition that took office after the electoral defeat of the left in 2004 has implemented a new institutional scheme in Porto Alegre. It is known as *governança solidária local* (local solidarity governance), which allegedly will deepen and broaden civic engagement. The scheme has been praised by mainstream international organisations but – for reasons to be discussed below – also strongly criticised by local NGOs, engaged researchers, leftwing political parties, and civil society organisations. This process is consistent with broader changes taking place at the international level through the sustained export of a lite version of participatory budgeting by rather non-democratic and non-participatory institutions such as the World Bank.¹

Dialectics of TSI politics

***A dialectical perspective
on innovation 'capture'
(Bonno Pel 2016)***

- Social innovations have a dialectic relation with established institutions - they both challenge them and reproduce them.
- To be transformative, inclusive & accessible, some sort of mainstreaming is needed (marketization, formalization, bureaucratization, normalization).
- TSI = highly political > need to be prepared for mainstreaming paradoxes.

Paradoxical political strategies

Translation & radical core
(Adrian Smith 2006, 2007)

- **Translating** (new ways of doing, knowing, framing & organizing) to mainstream context, while also maintaining one's **radical core**
- SI-initiatives need flexible **portfolio of different - often paradoxical - strategies** towards institutional change (*supplementing, lobbying, protesting, compromising, complying, circumventing, avoiding, seducing, negotiating, imitating, surprising... etc.*)

The test of a first-rate intelligence is the ability to hold two opposed ideas in the mind at the same time, and still retain the ability to function. One should, for example, be able to see that things are hopeless and yet be determined to make them otherwise.

(F. Scott Fitzgerald)

Thank you.
