Research Aim & Questions

To develop a theory of **transformative** **social innovation**

that is **grounded** and **tested** in empirical data,

and **useful** to policy-makers, activists, entrepreneurs, critical intellectuals and researchers.

Research questions:

- how, to what extent and under which conditions does social innovation contribute to transformative change?
- how are people empowered (or disempowered) to contribute to such processes?
- how do we conceptualise and study transformative social innovation?
