

transformative social innovation theory

Launch web-based resource hub

Deliverable n. 6.2

Theme [ssh.2013.3.2-1][Social Innovation- Empowering People, changing societies]

Project Full Title: "Transformative Social Innovation Theory project"

Grant Agreement n. 613169

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 613169

transformative social innovation theory

Focus of deliverable:

This deliverable is the first version of the web-based resource hub, as described in the Description of Work and Deliverable 6.1. The web-based resource hub is meant for policymakers, practitioners, academics and a wider audience and aims to provide resources that contribute towards understanding if so and how social innovation (dis)empowers actors and transforms society.

Acknowledgements:

We thank the designers from [Zinnebeeld](#) for their design of the web-based resource hub.

transformative social innovation theory

1 Web-based resource hub

The website/web-based resource hub is set as the central node of the on-line presence of the TRANSIT project. The TRANSIT web-based resource hub has two functions: 1) act as a project website and 2) act as an on-line resource hub.

1.1 The development of a TRANSIT web-based resource hub

The website will be developed in 3 phases. Phase 1 and 2 are now completed.

Website 1 was launched in month 3 and was a basic website that included general project information on the aim and structure of the project, its conceptual focus and the research partners. The website showed the outside world that we started and allowed others to find about the TRANSIT approach and it gave them the opportunity to get in touch with the various TRANSIT partners (see Annex 1).

Website 2, which was launched on 31 July 2014 and topic of this deliverable, is the first version of the web-based resource hub. It includes material ranging from general project information and professional and academic sources to videos on (transformative) social innovation and a search engine that allows visitors to search through all the resources using search criteria. The characteristics of this resource hub are topic of the subsequent section (see Annex 2). Website 2 provides an entry-point for a database of transnational networks and their 'local' initiatives, to be developed in WP5.

Website 3 (month 17, WP 5) will include the database, to which website 2 provides an entry-point. As it is stated in the Communication & Dissemination Strategy, an important characteristic of the TRANSIT website will be its connection with the social media platforms that are going to be used for the project as well as the use of video(embedded from Vimeo and YouTube) to complement and in some cases replace text. In relation to the web-based resource hub, a database of transnational networks and of research data will be created and available through the TRANSIT website. N.B. as a result of privacy we cannot make all data open source, but we will aim to work as openly as we possibly can. The data will be easily searchable as well as through different search paths (maps, key words). In the website we will give an explanation about the meaning of the words that form the conceptual corners stones of our research ("game changers", "transformative discourses", "social innovation", "empowerment" and the 4 thematic focus areas (governance, social learning, resourcing, monitoring) and we will illustrate them with examples. Already in website 2, the explanation of the key-concepts and its connection to various social media platforms are present.

The URL for the TRANSIT website is: www.transitsocialinnovation.eu.

1.1.1 Offering resources on (transformative) social innovation

Searching the internet for information on 'social innovation' is quite an overwhelming experience. Google finds over 89,000,000 webpages. Many of these websites have 'hub'-like characteristics, for

transformative social innovation theory

example through a search bar. The question then is: how can TRANSIT stand out? What makes the TRANSIT resource hub special?

One of the niches of TRANSIT, that we aim at developing further through this website, is that we are interested in *transformative* social innovation, thus innovation that somehow may or may not (dis)empower actors and transform society. Our resource-hub is focused on communicating this message. Thus, while we believe that sharing knowledge leads to spreading ideas quickly, we do target our ‘knowledge’ and ‘ideas’. In short, the objective of the website is not to collect and give access to knowledge about social innovation in a widely divergent way, but to give access to information and knowledge about (transformative) social innovation, according to TRANSIT. Section 1.1.2. examines exactly how TRANSIT does so.

1.1.2 Characteristics of the web-based resource hub

TRANSIT’s DoW mentioned various characteristics of the web-based resource hub, which were further elaborated in the Communication & Dissemination Strategy (Deliverable n. 6.1). In the table below, the column on the left lists the various characteristics as described in the DoW and D6.1. The column on the right describes how the web-based resource hub is actually meeting these characteristics. Please refer to Annex 2 for screenshots of the web-based resource hub.

Table 1 - Characteristics and features of the Web-based resource hub

No.	Desired characteristics	Actual features
From DoW and Communication & Dissemination Strategy:		
1	We aim for a dynamic and visual communication approach grounded in, for instance, audio-visuals, info graphics and video messages.	<ul style="list-style-type: none"> The homepage of our resource-hub contains a visually attractive map, that one can directly browse, that differentiates us from other websites on social innovation with ‘hub-like’ characteristics or objectives. The world-map, the TRANSIT highlights and a search bar, provide access to ‘visual and dynamic data’, such as video’s, and websites, next to our other sources, such as academic articles, articles of various characters. The website is compatible with various screen sizes, such as iPad and mobile phones
2	Attractive to our target audiences: mainly to <ul style="list-style-type: none"> policymakers, social innovators and entrepreneurs, academics and wider audience 	To enhance the attractiveness of our resource-hub for various audiences, we implemented <ul style="list-style-type: none"> Various forms of searching and browsing through the materials in our resource hub. Providing access via various portals ensures that target audiences can choose the portal of their liking, that fits their practice and their interests,

transformative social innovation theory

		<ul style="list-style-type: none"> • Various degrees within the search functions. For example the map invites browsing and looking around in the field of (transformative) social innovation, whereas the TRANSIT highlights point the visitor in a certain direction. The search bar may be used for both objectives: it invites browsers through the material as well as more targeted searches, • Various materials that are attractive to these audiences. These range from academic sources to video's that introduce a topic on (transformative) social innovation.
3	<p>Attractive to focus groups for objectives of the project:</p> <ul style="list-style-type: none"> • transnational networks, • reference group, • other EU SI –researchers 	<p>Next to the above, we offer to these focus groups:</p> <ul style="list-style-type: none"> • The possibility to access information and learn about other networks, • Access to tools and policy briefs (which will be added to the resource-hub, once these are due) • The possibility to become a member of the reference group, • Insights into the materials, such as academic resources, that may be of help for other projects.
4	<p>General project information on the aim and structure of the project</p>	<ul style="list-style-type: none"> • Provided on 'about transit'-page
5	<p>A library on transformative social innovation</p> <ul style="list-style-type: none"> ○ Academic sources ○ Professional/practitioner sources 	<ul style="list-style-type: none"> • Via map, highlights and search bar
6	<p>Videos on social innovation</p> <ul style="list-style-type: none"> ○ YouTube ○ Vimeo 	<ul style="list-style-type: none"> • Via map, highlights and search bar
7	<p>Project Deliverables</p>	<ul style="list-style-type: none"> • Via map, highlights and search bar • Deliverables that are public will be published on the 'about TRANSIT'-page. This means the Deliverables can be accessed as well through the entry-points on the homepage, as through the 'about TRANSIT'-page. In due time, we will create an extra header that serves as an entry-point to these Deliverables.
8	<p>Options to get feedback & communication engagement options</p>	<ul style="list-style-type: none"> • Through the page 'Get involved!' the visitors are enabled to leave their message to TRANSIT behind. This may be a question, an idea, an event

transformative social innovation theory

		<p>that TRANSIT can share on its agenda, or that the visitor likes to become a member of our reference group.</p> <ul style="list-style-type: none">• As the web-based hub has just launched, these reactions will at first be hidden, meaning the communication team (in WP6) receives these reactions in their mailbox. When it shows that this page actually attracts reactions, this page will be opened (+ edited), equal to a forum. We keep it closed at first, because – in case of no interaction and reaction to our work - otherwise it may look like a ‘dead forum’.• In the course of this project – as the tools become available – this page will be transformed into a ‘What can you do?’- page. This page will then also showcase our toolboxes and other options to get engaged to our research. However, as this page will in the beginning be relatively empty (as there are no tools yet to be demonstrated – the first is due in December), we will keep this page as a future-option until such content is ready for publication.• See also 20 for the blog as a useful instrument for initiating first forms of communication.
9	Explanation of core concepts and terminology	<ul style="list-style-type: none">• On the homepage, the core concepts are highlighted and described.• These concepts are one of the entry-points into the database. The visitor will thus find various resources that delve deeper into these concepts.• We initially provide the shortened versions of the definitions and conceptualizations used in the latest Deliverables. These concepts can change and/or are expanded in the course of the research. The set up of the website allows an expansion, both in quantity and quality of the concepts.• This means that, when concepts change, they will still be tagged to the material in the hub. When we add a new concept, re-tagging has to be done by hand.
10	Events (using a time line)	<ul style="list-style-type: none">• The web-based resource hub provides an agenda with the items we think are of interest for visitors interested in (transformative) social innovation.

transformative social innovation theory

		<ul style="list-style-type: none"> • There is the possibility to highlight agenda-items on the homepage. Otherwise, agenda-items are published on the page titled 'agenda'.
11	Organizations and websites	<ul style="list-style-type: none"> • Via map, highlights and search bar
12	Discussion topics	<ul style="list-style-type: none"> • See under 8
13	Policy papers and training tools	<ul style="list-style-type: none"> • To be provided both through the resource hub, and on page 'what can you do?' (currently: 'Get involved!').
14	Search engine that allows visitors to search through all the resources using search criteria	<ul style="list-style-type: none"> • Via map, highlights and search bar
15	It will be possible to use the conceptual 'labels' a) game changers; b) governance; c) social learning; d) funding/ resourcing and e) monitoring as search criteria	<ul style="list-style-type: none"> • These are amongst the highlighted TRANSIT-terminology
<p>In addition to the above, the interface will:</p>		
16	Demonstrate the progress of work within each work package	<ul style="list-style-type: none"> • Via showcasing the Deliverables on 'about TRANSIT'-page, in the resource-hub and on the 'what can you do'-page?
17	Give access to the database of transnational networks on social innovation	<ul style="list-style-type: none"> • The resource hub now provides information about the networks that are under study. • The website contains an entry-point into the database that is later developed in WP5.
18	Make crucial information available in at least two EU-languages	<ul style="list-style-type: none"> • In co-operation with partners, the 'about-page' will be translated into Spanish.
19	It will be linked to social media accounts	<ul style="list-style-type: none"> • The website is our main digital entry-point and we use social media such as twitter and facebook to direct visitors to our website. • Social media buttons are placed in the footer of the website.
20	Give access to a blog	<ul style="list-style-type: none"> • A blog provides the possibility for researchers to communicate with the audience directly. Through the blog, TRANSIT researchers can share their first insights with a larger audience. • We also use the blog to highlight certain elements in our resource-hub, events that are going to be and have been. • Through a blog-planning, an update once a month is prepared.

transformative social innovation theory

1.1.3 Population of the web-based resource hub

At the moment the resource hub is contains about 60 resources of various characters. The resource hub is populated back to back with the research progressing. In doing so, the hub is developed in a relevant direction in order to focus on the message that TRANSIT aims to convey. This is an iterative process within which the TRANSIT researchers may use the resource hub for finding resources, while feeding it at the same time. The communication team initiates the population.

transformative social innovation theory

transformative social innovation theory

Project description | Conceptual focus | Vision and mission | Partners and contact | Case studies and approach | Structure

Project description

TRANSIT (TRANSformative Social Innovation Theory) is an ambitious research project that will develop a theory of transformative social innovation which is about empowerment and change in society. It is co-funded by the European Commission and runs for four years, from January 2014 until December 2017. TRANSIT will utilize a research method which encourages feedback from social entrepreneurs and innovators, policy makers and academics to develop a theory with practical relevance. The theory will be based on insights from other theories e.g. transition theory, social movement theory and institutional theory. The research project studies how social innovation can bring about empowerment and societal transformation.

Conceptual focus

start [taskbar icons] Search Desktop 12:13

Conceptual focus

TRANSIT is structured around 4 thematic focus areas: governance, social learning, funding and monitoring. We will develop theoretical and practically relevant insights for those thematic areas, which will form the basis for policy briefs and capacity building tools. Examples of questions that will be addressed include: what forms of governance facilitate transformative social innovation?; how can funding mechanisms become more effective? TRANSIT also zooms in on the effects of macro trends in society, such as the financial crisis, climate change and the ICT-revolution, which we refer to as 'game changers'. It aims to develop insights about interpreting future changes (that can be used in e.g. forecasting and scenario planning tools) and about improving our effectiveness while working in changing circumstances. In conclusion TRANSIT aspires to develop interdisciplinary theory by analysing practical examples of social innovation and by translating this theory into practical insights and capacity building tools.

Vision and mission

Vision – Increase the impact and potential of transformative social innovation that can empower people and facilitate change for sustainable development in society.

Mission – Develop a theory of transformative social innovation with a focus on empowerment and change in society that is both relevant and practical.

Partners and contact

The TRANSIT project is coordinated by DRIFT (Erasmus University Rotterdam, the

Partners and contact

The TRANSIT project is coordinated by DRIFT (Erasmus University Rotterdam, the Netherlands), and involves twelve separate research institutes from across Europe and Latin-America.

- [DRIFT \(Coordinator\)](#) – Erasmus University of Rotterdam, the Netherlands
- [3S-group](#) – University of East Anglia, United Kingdom
- [ICIS](#) – University of Maastricht, the Netherlands
- [IHS](#) – Erasmus University of Rotterdam, the Netherlands
- [ULB-CEDD](#) – Université Libre de Bruxelles, Belgium
- [AAU](#) – Aalborg University, Denmark
- [SPRU](#) – University of Sussex, United Kingdom
- [IEC-UNQ](#) – Universidad Nacional de Quilmes, Argentina
- [COPPE](#) – Rio de Janeiro Federal University, Brasil
- [People-Environment Research Group](#) – Universidade da Coruña, Spain
- [BOKU](#) – University of Natural Resources and Life Sciences Vienna, Austria
- [ESSRG](#) – research and development SME, Hungary

Contact: scientific coordinators Flor Avelino & Julia Wittmayer (DRIFT) whom can be reached by e-mail via transit@drift.eur.nl.

Case studies and research approach

In this project we study social innovations that are locally active and globally connected. TRANSIT aims to unravel how social innovation can support transformation by carrying out in-depth case study analysis of 20+ transnational networks across Europe and Latin America.

Examples of the type of networks that we aim to research are:

- [The Impact-Hub](#) – Global network of social entrepreneurs

The research is organized as an iterative process with many feedback loops. It builds on existing theory and on insights from case studies (the empirical part). It then develops and tests a 'middle range theory' that aims to be practically relevant. This theory will be adapted based upon feedback from a variety of academics that operate in various disciplines, social entrepreneurs and innovators and policymakers. The most important lessons will then be translated into practical (training) tools and policy briefs.

Structure of the project

TRANSIT is structured in 6 Work Packages.

WP1 Project management – the coordinator is DRIFT (Erasmus University Rotterdam, the Netherlands) and it is set up to coordinate, develop, integrate and manage all (financial, scientific, information) resources of the consortium. It does the overall management, establishes and keeps contact with an Interdisciplinary Advisory Board and it will be facilitating scientific & internal knowledge

The research is organized as an iterative process with many feedback loops. It builds on existing theory and on insights from case studies (the empirical part). It then develops and tests a 'middle range theory' that aims to be practically relevant. The most important lessons will then be translated into practical (training) tools and policy briefs.

Structure of the project

TRANSIT is structured in 6 Work Packages.

WP1 Project management – the coordinator is DRIFT (Erasmus University Rotterdam, the Netherlands) and it is set up to coordinate, develop, integrate and manage all (financial, scientific, information) resources of the consortium. It does the overall management, establishes and keeps contact with an Interdisciplinary Advisory Board and it will be facilitating scientific & internal knowledge

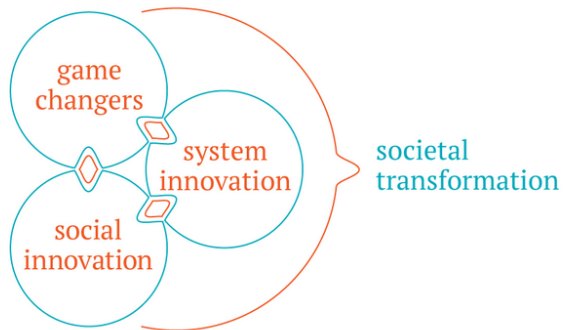

transformation by carrying out in-depth case study analysis of 20+ transnational networks across Europe and Latin America.

Examples of the type of networks that we aim to research are:

- **The Impact-Hub** – Global network of social entrepreneurs
- **Ashoka** – Network for financial support to social entrepreneurs
- **Time Banks** – Network facilitating reciprocal service exchange
- **Credit Unions** – Different types of credit cooperatives
- **RIPES** – Network for the promotion of social solidarity economy
- **FABLABS** – Digital fabrication workshops open to local communities
- **Hackerspace** – User driven digital fabrication workshops
- **Living Knowledge Network** – Network of science shops and other community-based research entities
- **DESIS-network** – Network for design for social innovation and sustainability
- **Global Ecovillage Network** – Network of villages that promote ecologically friendly development
- **Transition Town** – Grassroots communities working on 'local resilience'
- **INFORSE** – International network of sustainable energy NGOs.

All those networks are to a certain extent related to one or more 'game changers' which are macro-trends that change the rules of the game and by doing so have a transforming impact on our society, e.g. the financial crisis, climate change and the ICT-revolution. Systemic change takes place at a meso level and involves fundamental changes related to the ways we live and how we use resources in societal (sub)systems that are defined in terms of function and/or geography (e.g. energy system, transport system, a particular city or region, etc.). Social innovations are social in its means and end and they include new social practices, new ideas, models, rules, relations, services and/or products. Social innovations take place at the micro scale. Societal transformation is a process of fundamental change at the level of societies and it is the result of change at macro, meso and micro level.

The research is organized as an iterative process with many feedback loops. It builds on existing theory and on insights from case studies (the empirical part). It then develops and tests a 'middle range theory' that aims to be practically relevant. This theory will be adapted based upon feedback from a variety of academics that operate in various disciplines, social entrepreneurs and innovators and policymakers. The most important lessons will then be translated into practical (training) tools and policy briefs.

Structure of the project

TRANSIT is structured in 6 Work Packages.

WP1 Project management – the coordinator is DRIFT (Erasmus University Rotterdam, the Netherlands) and it is set up to coordinate, develop, integrate and manage all (financial, scientific, information) resources of the consortium. It does the overall management, establishes and keeps contact with an Interdisciplinary Advisory Board and it will be facilitating scientific & internal knowledge

Rotterdam, the Netherlands) and it is set up to coordinate, develop, integrate and manage all (financial, scientific, information) resources of the consortium. It does the overall management, establishes and keeps contact with an Interdisciplinary Advisory Board and it will be facilitating scientific & internal knowledge management.

WP2 Synthesis – the coordinator is ICIS (University of Maastricht, the Netherlands). The main objective is translating theoretical insights into working papers, policy recommendations and practical tools. The tasks are the organisation of synthesis workshops, the production of working papers, policy briefs and prototypes for tools.

The focus areas of those outputs are:

- Global Societal Challenges and Game-changers in relation to Social Innovation
- Governance
- Social Learning
- Theme Funding
- Theme Monitoring

WP3 Theory and concepts – the coordinator is the 3S-group (University of East Anglia, United Kingdom) and the overall objective is to develop a practically relevant middle-range theory of transformative social innovation processes in an iterative process and in co-production with a variety of actors. Central questions are how social innovation relates to its context and how it is influenced by and influences the dynamics in society as well as how we can value and measure impacts and processes of transformative social innovation.

WP4 In-depth Case Studies – The coordinator is the Aalborg University (Denmark) and the focus is the collection and analysis of in-depth empirical evidence about social innovation. This will be done by carrying out in-depth case studies of transnational social innovation networks and their local manifestations that follow a set of methodological case study guidelines.

WP5 Meta-Analysis – the coordinator is the ULB-CEDD - Université Libre de Bruxelles, Belgium. In contrast to WP4 that has an in-depth focus, this WP aims to collect and analyse a high quantity of evidence about social innovation. This will be done by conducting a survey amongst local manifestations of transnational social innovation networks. The results will be collected in an open-source internet-based database (web-based resource hub). The data is analysed by means of detailed comparative, quali-quantitative analyses against the research questions identified in WP3.

WP6 Communication and engagement – the coordinator is IHS (Erasmus

start | Inbox - zuiderv... | Homepage - TRA... | Microsoft Word | website | Final_C&E_Strat... | Search Desktop | 12:14

Anglia, United Kingdom) and the overall objective is to develop a practically relevant middle-range theory of transformative social innovation processes in an iterative process and in co-production with a variety of actors. Central questions are how social innovation relates to its context and how it is influenced by and influences the dynamics in society as well as how we can value and measure impacts and processes of transformative social innovation.

WP4 In-depth Case Studies – The coordinator is the Aalborg University (Denmark) and the focus is the collection and analysis of in-depth empirical evidence about social innovation. This will be done by carrying out in-depth case studies of transnational social innovation networks and their local manifestations that follow a set of methodological case study guidelines.

WP5 Meta-Analysis – the coordinator is the ULB-CEDD - Université Libre de Bruxelles, Belgium. In contrast to WP4 that has an in-depth focus, this WP aims to collect and analyse a high quantity of evidence about social innovation. This will be done by conducting a survey amongst local manifestations of transnational social innovation networks. The results will be collected in an open-source an internet-based database (web-based resource hub). The data is analysed by means of detailed comparative, quali-quantitative analyses against the research questions identified in WP5.

WP6 Communication and engagement – the coordinator is IHS (Erasmus University Rotterdam, the Netherlands) and the objective is the communication of the project results, stakeholder engagement and the facilitation of learning and capacity building in EU and Latin America. This WP shares knowledge and insights about transformative social innovation with a web based resource hub and it actively engages with other actors via engagement workshops, a reference group and by linking to existing SI platforms.

TRANSIT highlights

Social Innovation

Social innovation refers to new social practices, including new ideas, new models, new rules, new social relations, new services and/or new products.

(Dis)empowerment

(Dis)empowerment is a process in which people gain (or loose) the feeling (or idea) that they can influence their surroundings and the direction of events.

(Transnational) Network

A (transnational) network is a collection of initiatives that are somehow linked to each other. This network may be crossing national borders.

relations, new services and/or new products.

surroundings and the direction of events.

network may be crossing national borders.

Social Entrepreneurs
Social entrepreneurs are actors using business skills and knowledge to create an enterprise that is commercially viable while also accomplishing a social purpose.

Game Changers
Game changers are macro-trends that are perceived to change the 'rules', 'players' and the 'game' of societal interaction. Think about the ICT-revolution and the financial 'crisis'.

Societal Transformation
A societal transformation is a fundamental and persisting change at the level of societies. Examples are the industrial revolution and European integration.

Monitoring
Monitoring is the process that actors use to evaluate or assess the impact/progress of their initiative/network.

Resourcing
Resourcing is to the process by which actors acquire the resources they need. These may be financial resources, but also artefacts, information or 'human resources'.

Governance
Governance refers to broader processes of governing (regulating, decision-making, steering) by all types of actors. This includes, but is not confined to government.

Social Learning
Social learning refers to the process through which people and groups learn from each other in varying social contexts.

System Innovation
System innovation is change at the level of societal sub-systems, meaning institutions, social structures and physical infrastructures.

Narrative of Change
A narrative of change is a discourse on change and innovation, i.e. a set of ideas, concepts, metaphors, narratives and/or story-lines about change and innovation.

Governance refers to broader processes of governing (regulating, decision-making, steering) by all types of actors. This includes, but is not confined to government.

Social Learning

Social learning refers to the process through which people and groups learn from each other in varying social contexts.

System Innovation

System innovation is change at the level of societal sub-systems, meaning institutions, social structures and physical infrastructures.

Narrative of Change

A narrative of change is a discourse on change and innovation, i.e. a set of ideas, concepts, metaphors, narratives and/or story-lines about change and innovation.

TRANSIT staff

Project description

TRANSIT (TRANSformative Social Innovation Theory) is an ambitious research project that will develop a theory of transformative social innovation which is about empowerment and change in society. It is co-funded by the European Commission and runs for four years, from January 2014 until December 2017. TRANSIT will utilize a research method which encourages feedback from social entrepreneurs and innovators, policy makers and academics to develop a theory with practical relevance. The theory will be based on insights from other theories e.g. transition theory, social movement theory and institutional theory. The research project studies how social innovation can bring about empowerment and societal transformation.

[View summary presentation](#)

Conceptual focus

TRANSIT is structured around 4 thematic focus areas: governance, social learning, funding and monitoring. We will develop theoretical and practically relevant insights for those thematic areas, which will form the basis for

transformative social innovation theory

About TRANSIT 2

The screenshot shows a web browser window with the URL www.transitsocialinnovation.eu/about-transit. The navigation bar includes links for Home, About TRANSIT, Resource hub, Agenda, TRANSIT blog, and Get involved! Below this, there is a section for TRANSIT staff, followed by a paragraph about the theory's application in forecasting and scenario planning. The 'Research Approach' section describes a dynamic and iterative process involving case studies, surveys, and workshops. A diagram illustrates the research process, starting with 'game changers' and 'social innovation' leading to 'system innovation' and 'societal transformation'. This leads to 'transition theories on power and empowerment' and 'middle-range theory of Transformative Social Innovation (TSI)'. The process then involves 'in-depth case studies' and 'meta-analysis and survey' to develop 'tools for social innovation'.

Home | About TRANSIT | Resource hub | Agenda | TRANSIT blog | Get involved!

TRANSIT staff

can be used in e.g. forecasting and scenario planning tools) and about improving our effectiveness while working in changing circumstances. In conclusion TRANSIT aspires to develop interdisciplinary theory by analysing practical examples of social innovation and by translating this theory into practical insights and capacity building tools.

Research Approach

The theory of Transformative Social Innovation will be formulated in a dynamic and iterative process that builds on existing theory, grounds the emerging theory in in-depth case studies and tests it through a meta-analysis of survey data. In this process, the research team continuously interacts with social innovators, social entrepreneurs, policymakers and scientists in a number of workshops applying and reviewing the emerging theory. Further outputs of this process include working papers, training tools, policy and practice briefs for social innovators, entrepreneurs, researchers and policymakers.

Vision and mission

Vision – Increase the impact and potential of transformative social

TRANSIT staff

Vision and mission

Vision – Increase the impact and potential of transformative social innovation that can empower people and facilitate change for sustainable development in society.

Mission – Develop a theory of transformative social innovation with a focus on empowerment and change in society that is both relevant and practical.

(Transnational) networks

Many social innovators of today work locally, but are connected with other innovators around the globe. TRANSIT explores these linkages by researching international networks of social innovation in Europe and Latin America as case studies both qualitatively and quantitatively. Examples of the type of networks that we aim to research are:

- **The Impact-Hub**, Global network of social entrepreneurs
- **Ashoka**, Network for financial support to social entrepreneurs
- **Time Banks**, Network facilitating reciprocal service exchange
- **Credit Unions**, Different types of credit cooperatives
- **RIPESS**, Network for the promotion of social solidarity economy
- **FABLABS**, Digital fabrication workshops open to local communities
- **Hackerspace**, User driven digital fabrication workshops
- **Living Knowledge Network**, Network of science shops and community-based research entities

transformative social innovation theory

About TRANSIT 4

The screenshot shows a web browser window with the URL www.transitsocialinnovation.eu/about-transit. The page features a navigation bar with links: Home | About TRANSIT | Resource hub | Agenda | TRANSIT blog | Get involved! Below this is a section titled "TRANSIT staff" which lists several research entities:

- **DESIS-network**, Network for design for social innovation and sustainability
- **Global Ecovillage Network**, Network of villages that promote ecologically friendly development
- **Transition Towns**, Grassroots communities working on 'local resilience'
- **INFORSE**, International network of sustainable energy NGOs

A decorative horizontal line with a colorful, wavy pattern separates the staff list from the "Structure of the project" section. This section states that TRANSIT is structured in 6 Work Packages. It details two of these packages:

- WP1 Project management** – the coordinator is DRIFT (Erasmus University Rotterdam, the Netherlands) and it is set up to coordinate, develop, integrate and manage all (financial, scientific, information) resources of the consortium. It does the overall management, establishes and keeps contact with an Interdisciplinary Advisory Board and it will be facilitating scientific & internal knowledge management.
- WP2 Synthesis** – the coordinator is ICIS (University of Maastricht, the Netherlands). The main objective is translating theoretical insights into working papers, policy recommendations and practical tools. The tasks are the organisation of synthesis workshops, the production of working papers, policy briefs and prototypes for tools. The focus areas of those outputs are:
 - Global Societal Challenges and Game-changers in relation to Social Innovation
 - Governance
 - Social Learning
 - Resourcing
 - Monitoring

The bottom of the screenshot shows the Windows taskbar with various open applications and the system clock at 16:17.

transformative social innovation theory

About TRANSIT 5

Home | About TRANSIT | Resource hub | Agenda | TRANSIT blog | Get involved!

TRANSIT staff

- Monitoring

WP3 Theory and concepts – the coordinator is the 3S-group (University of East Anglia, United Kingdom) and the overall objective is to develop a practically relevant middle-range theory of transformative social innovation processes in an iterative process and in co-production with a variety of actors. Central questions are how social innovation relates to its context and how it is influenced by and influences the dynamics in society as well as how we can value and measure impacts and processes of transformative social innovation.

WP4 In-depth Case Studies – The coordinator is the Aalborg University (Denmark) and the focus is the collection and analysis of in-depth empirical evidence about social innovation. This will be done by carrying out in-depth case studies of transnational social innovation networks and their local manifestations that follow a set of methodological case study guidelines.

WP5 Meta-Analysis – the coordinator is the ULE-CEDD - Université Libre de Bruxelles, Belgium. In contrast to WP4 that has an in-depth focus, this WP aims to collect and analyse a high quantity of evidence about social innovation. This will be done by conducting a survey amongst local manifestations of transnational social innovation networks. The results will be collected in an open-source internet-based database (web-based resource hub). The data is analysed by means of detailed comparative, qualitative and quantitative analyses against the research questions identified in WP3.

WP6 Communication and engagement – the coordinator is IHS (Erasmus University Rotterdam, the Netherlands) and the objective is the communication of the project results, stakeholder engagement and the facilitation of learning and capacity building in EU and Latin America. This WP shares knowledge and insights about transformative social innovation with a web based resource hub and it actively engages with other actors via engagement workshops, a reference group and by linking to existing SI platforms.

5th International Conference on Sustainability Transitions

August 27 2014 at 09:00, Utrecht

The [5th anniversary of the International Sustainability Transitions \(IST\) Conference](#) is celebrated in Utrecht. The IST conference is the central venue for scholars to share theoretical and empirical advances in the field of sustainability transitions. Sustainability transitions are transformations of major socio-technical systems such as energy, water, transportation, and food towards more sustainable ways of production and consumption. It is a multidisciplinary field with inputs from heterodox economics, environmental governance, innovation studies, sociology and history.

The conference is part of the activities of the [STRN](#) network and linked to Elsevier's journal Environmental Innovation and Societal Transitions.

Submit your paper

[Call for papers](#) is available. You may submit your paper by visiting the Ex Ordo paper submission system (you will be required to setup an account first): <http://ist2014.exordo.com/>

Programme

The conference will start on Wednesday morning August 27th and will end on Friday afternoon August 29th (at 16.00 hours the latest). On Tuesday there will be welcome drinks in the early evening. A [preliminary programme](#) is available..

 - metadata**
 - Authors: Reeder, Neil; O'Sullivan, Carmel; Tucker, Simon; Ramsden, Peter and Mulgan, Geoff
 - Publication date: 2012
 - Keywords: [social innovation](#), [metrics](#), [policymakers](#)
 - ISBN/ISSN: 9789279261220
- Download/Enter web button:** A blue button with a document icon and the text "Download / Enter web".
- Text summary:**

This paper sets out the current approaches to assessment of social innovation as a field in itself, and the effects of social innovations that are implemented through programmes, projects and enterprises. The authors examine metrics to support policy development; approaches that support investment decisions; metrics to support the growth of social innovations; and actions that can support knowledge and learning. They conclude that relatively little is known on the extent of social innovation and how well it is supported. Data systems struggle to cope with the issue - for social innovation is an approach, rather than a sector, with achievements that are often centred on new types of relationship and changed minds rather than tangible products. It is unlikely that there will ever be one single social innovation indicator in the EU. They suggest that the Commission, in cooperation with Member States and regions, develops and publishes a prototype scoreboard, compiled for each Member State, which draws out progress on the agenda, and highlights where more effort is needed. [Extracted from Executive Summary].
