This is an overview of the publications that have been produced in the TRANSIT research project.

Acknowledgements:
We thank all the researchers and communication experts in TRANSIT for publishing. By publishing, we are sharing the work that has been produced within this TRANSIT research project. Additionally, we thank all the people that made time available for making our case study research possible, which forms an important basis for the publications presented in this deliverable.

TRANSIT Publications: Why, What, Where

Why we published in TRANSIT

The EC’s grant for the TRANSIT research allowed TRANSIT researchers to study transformative social innovation in-depth and to develop a theory that helps us better understand the phenomena during January 2014- December 2017. The insights that we have gathered throughout this process are relevant for a variety of audiences. As an academic research project it addressed researchers, but in addition it addressed other actors such as policy makers, innovators and other who engage in social innovation, professionally, voluntary or in a combination of those forms. The publications that we have produced aim to serve the need for knowledge about transformative social innovation, to give insights that show the potential as well as pitfalls and sometimes even the ‘dark side’ of it and to start debates and develop entry-points for new studies. They come in various forms and are made as easily accessible as possible to a broad audience.

A variety of TRANSIT publications

Having finalized the TRANSIT research project we are happy to say that we have exceeded our own expectations with a publication record of: six (6) Edited volumes & Special Issues and twenty-seven (27) published journal articles and book chapters (December 2017). We developed a (internally TRANSIT peer-reviewed) working paper series in which we have published sixteen (16) TRANSIT working papers. We published empirical material in the form of twenty (20) in-depth case study reports and summary reports and more than eighty (80) elaborated timelines of social innovation initiatives. Moreover, we have published material that targets a broader audience, including six (6) TRANSIT Briefs, numerous blogs and videos.

Accessibility of TRANSIT publications

We have aimed to make our TRANSIT research outputs as accessible as possible by making most of it available via open access and easy to reach on the TRANSIT website (www.transitsocialinnovation.eu). This overview guides you through the ‘TRANSIT resources’ menu and gives an overview of what can be found there. The following types of publications/outputs are included:

- Edited volumes & special issues
- Journal articles and book chapters
- TRANSIT working paper series
- TRANSIT Briefs
- TRANSIT Case Study Reports
- TRANSIT Deliverables
- Blog posts
- Other

6. CTP database

In TRANSIT we have studied timelines of development paths of more than eighty (80) social innovation initiatives, which are local manifestations of the 20 social innovation networks that we have studied in-depth. Those timelines are constructed around Critical Turning Points (CTPs), which are breakthroughs, setbacks and surprises that form the basis for decisive changes for the social innovation initiatives. We have made the timelines accessible via a database that is fully accessible online via http://www.transitsocialinnovation.eu/sii.

We have also analysed the data and the analysis of the Critical Turning Points of these initiatives is available in Pel et al (2017) the 'Synthesis report: meta-analysis of critical turning points in TSI', which is the TRANSIT Deliverable 5.4. This analysis has contributed to the consolidation of a Theory for Transformative Social Innovation. There is more information available on the methodology and approach in the TRANSIT working paper 10, by Pel et al (2017) which is called 'The critical turning points database: concept, methodology and dataset of an international Transformative Social Innovation comparison'.

7. TRANSIT Deliverables
